

## coveralls

The Maxisafe range of coveralls are designed to protect workers from a range of hazardous substances, products and processes. They are typically used in situations where cleanliness and hygiene are critical for protection from fine particles, liquid splashes or fine spray providing a physical, throw away barrier that is cost effective and doesn't require decontamination. Maxisafe coveralls meet the applicable European Standards for Chemical Protective Clothing, Category III.

Spray-tight clothing. Barrier to saturation and spray of liquids (EN14605 and 468).

**TYPE 5** Particle-tight clothing. Barrier to hazardous airborne particulate materials and dust (EN 13982-1).

**TYPE 6** Limited splash-tight clothing. Barrier to limited splash and liquid spray (EN 13034).

**EN 1149.5** Anti-static. Anti-statically treated and offering electrostatic protection according to EN 1149-1.
